Effective Classroom Management

This session is designed to help teachers, as well as other education professionals, improve their instruction and classroom management skills. This session provides the necessary foundations for classroom management skills on which other instruction and behavior management must build – communication skills, interventions for difficult behavior, creating an effective climate, rules, routines, and reinforcements for positive behavior and optimal learning.

Emerging Leaders/Basic Leadership Skills

In this session, you will identify your leadership potential by examining leadership styles, analyzing elements found in effective leaders, and building your confidence to lead. Also, you will examine how language affects leadership effectiveness and develop an action plan for your involvement in the Association.
